

Das Sortierspiel:

Im Abfall steckt viel drin. Aber welcher Abfall gehört in welchen Behälter?

Mit dem Sortierspiel kann Abfalltrennung spielerisch eingeübt werden.

Für das Spiel benötigen wir einige Behälter (Eimer, Kartons etc.) die als

- Wertstofftonne (früher Gelbe Tonne)
- Papiertonne
- Biotonne
- Restmülltonne
- Glascontainer mit Kammern für Weiß-, Grün- und Braunglas genutzt werden.

Dann müssen die Plakate und Tafeln mit den Abfällen ausgedruckt werden.

Die Plakate zeigen, wie die Abfälle zugeordnet werden sollen, z.B.

In die **Biotonne** gehören:

In die Wertstofftonne *) gehören:

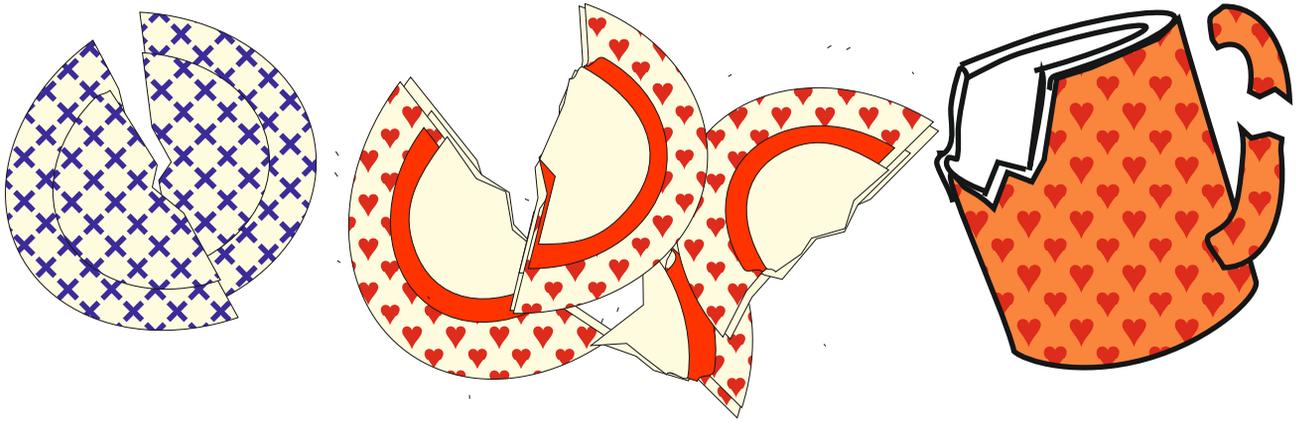

*) früher Gelbe Tonne nur für Verpackungen

Die Tafeln mit den Abfällen zeigen jeweils sechs Abfälle pro Blatt. Die Blätter müssen zerschnitten und auf feste Pappen aufgeklebt oder laminiert werden. Dies sind dann die Abfälle, die sortiert werden. Und fertig ist das Spiel!

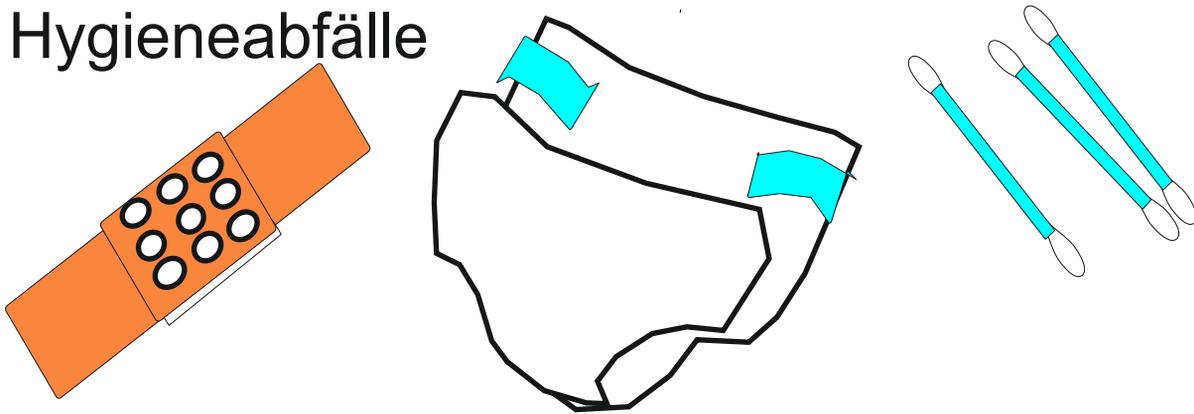

In den Restmüll gehören:

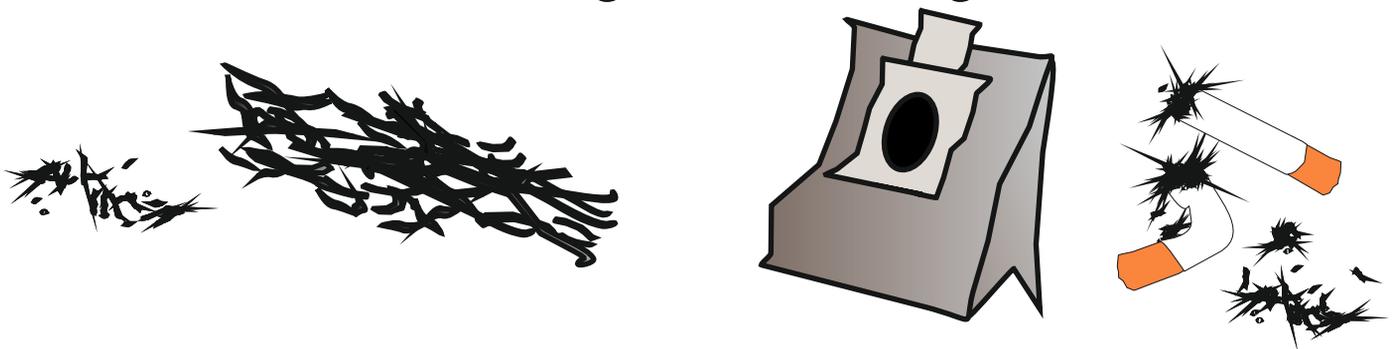

- defekte Haushaltswaren, kaputtes Geschirr u.ä.

- Hygieneabfälle

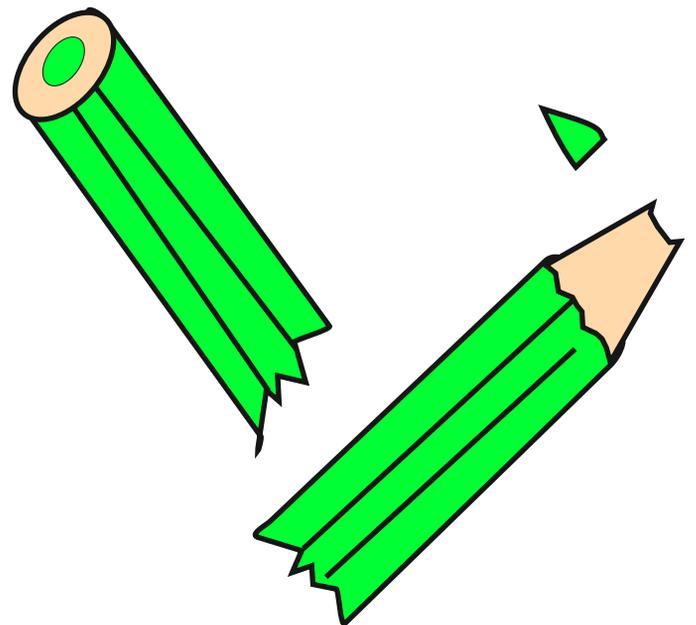

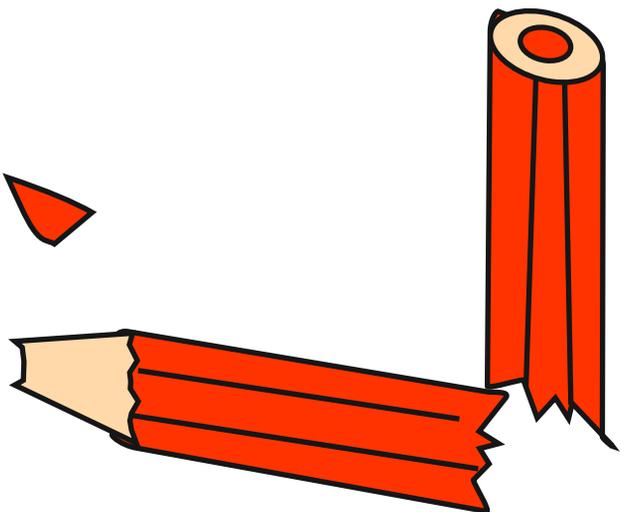

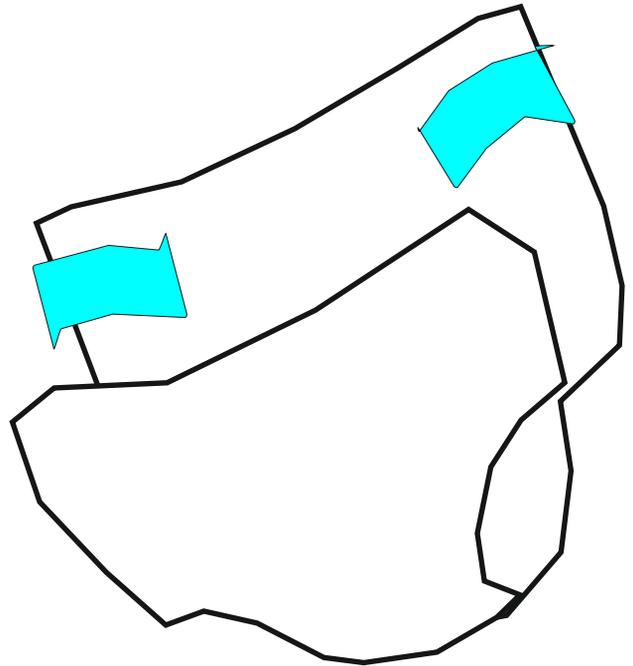

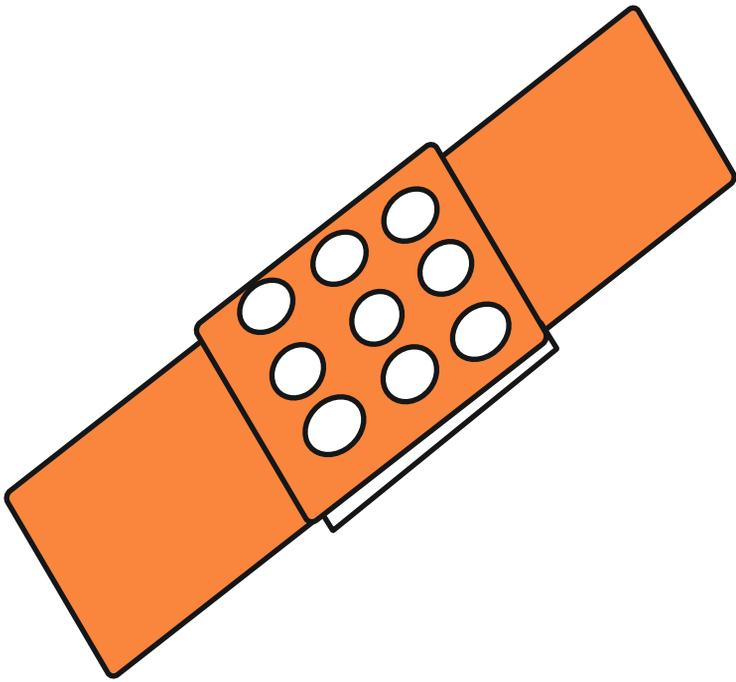

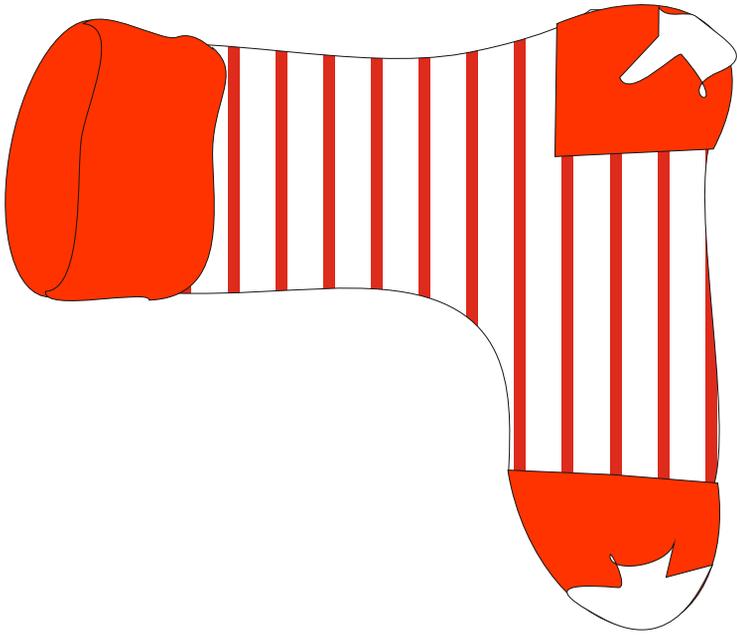

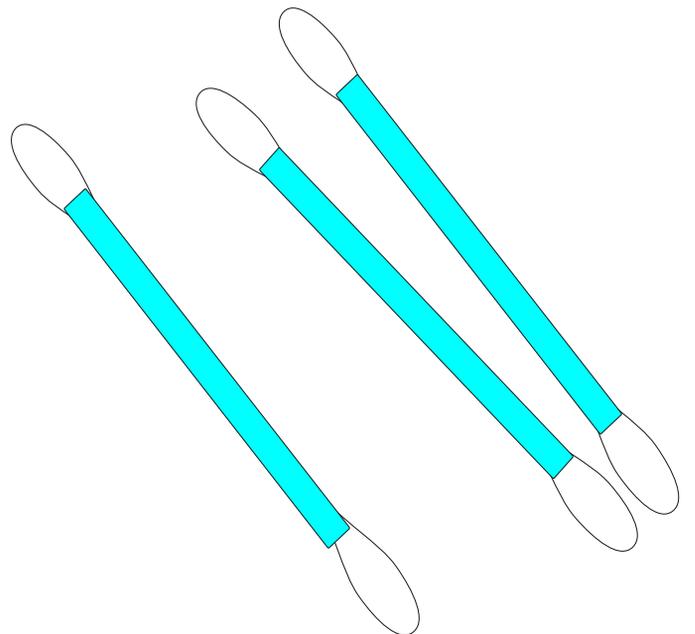

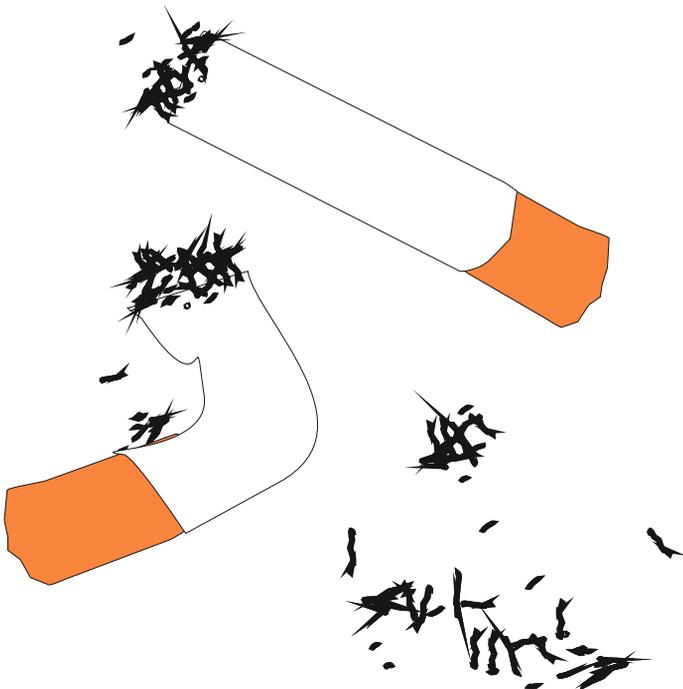

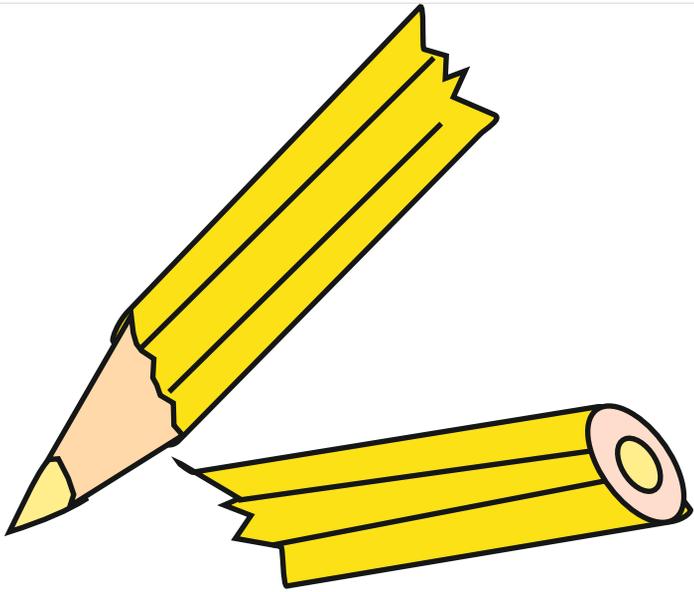

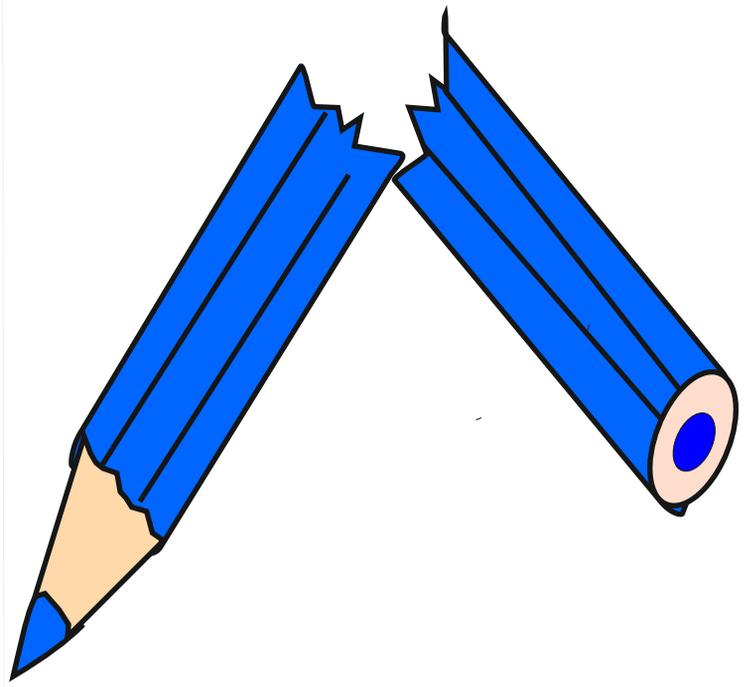

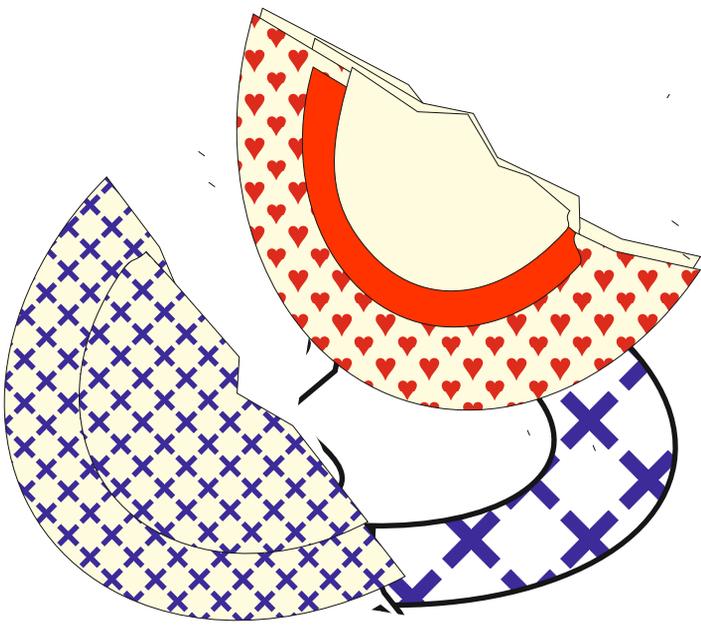

- Kehricht, Staubsaugerbeutel, Zigarettenstummel

- kaputte Textilien, Reste von Stiften, Kerzen u.a

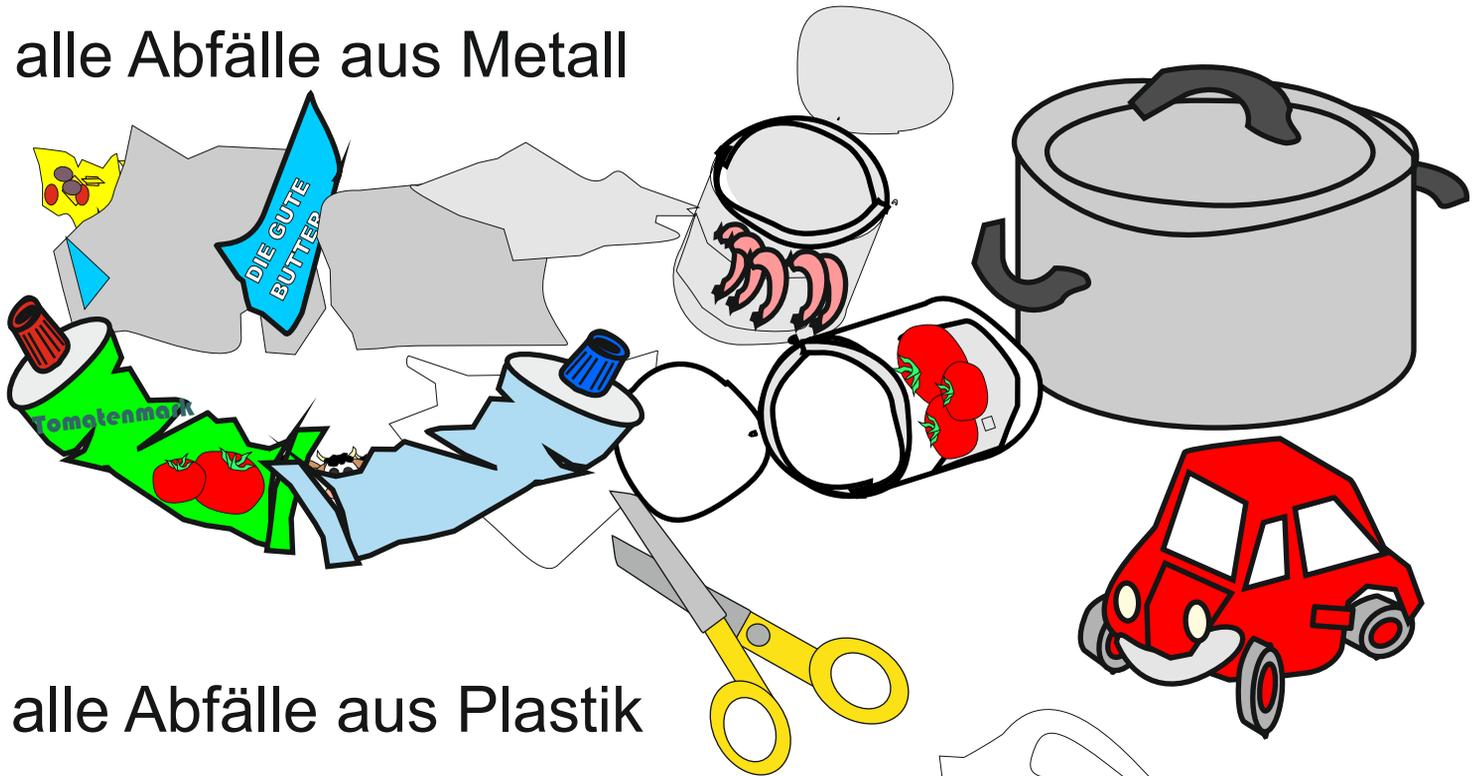

In die Wertstofftonne*) gehören:

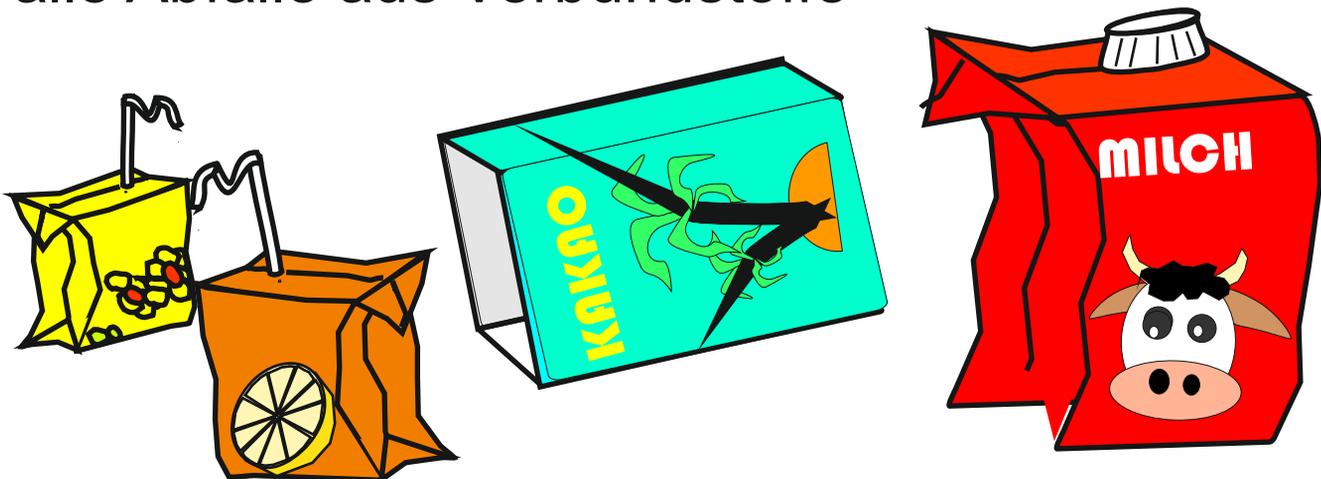

- alle Abfälle aus Metall

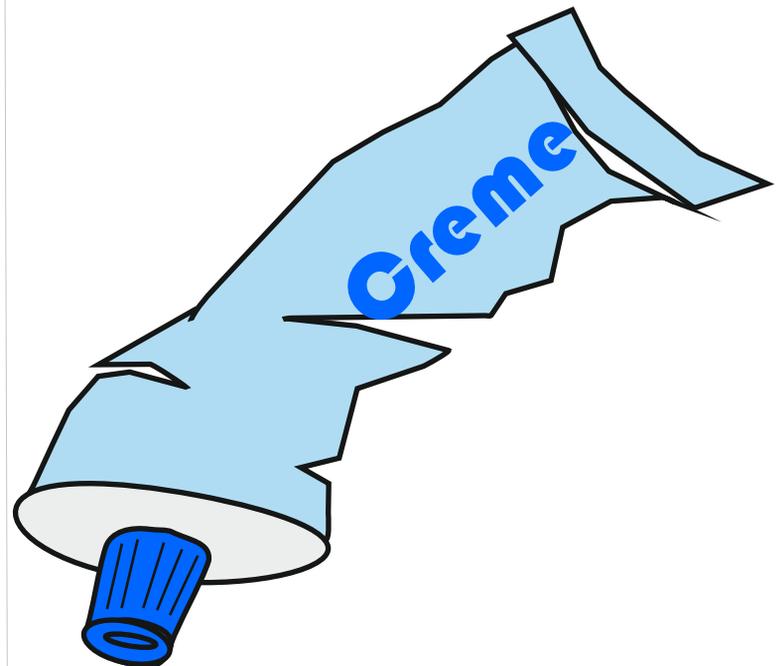

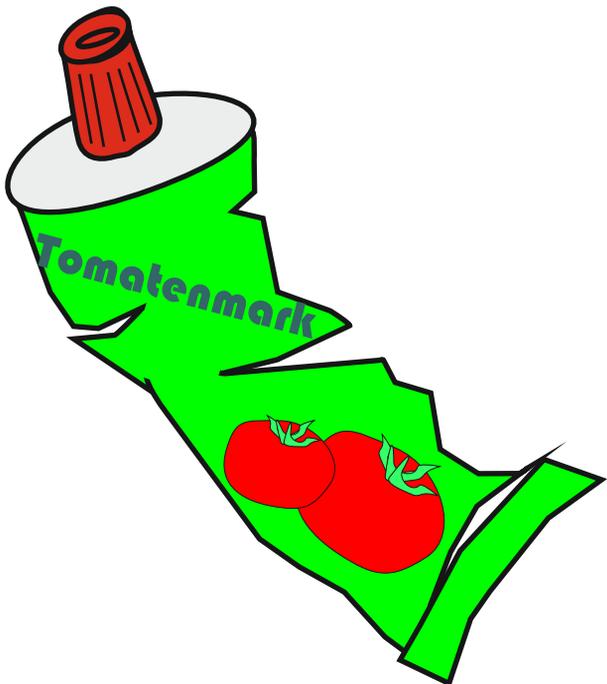

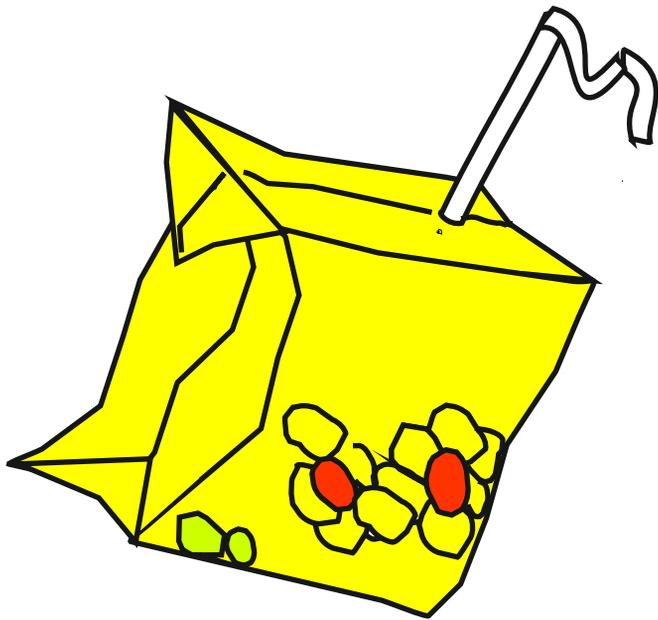

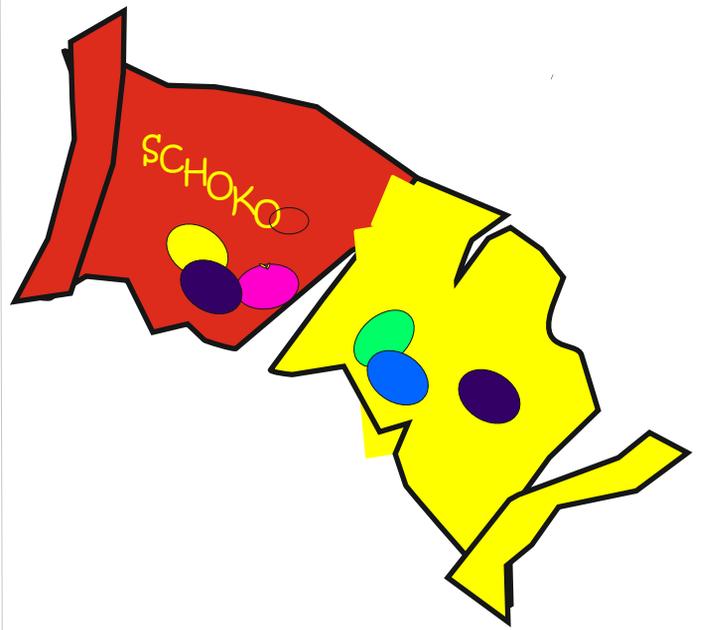

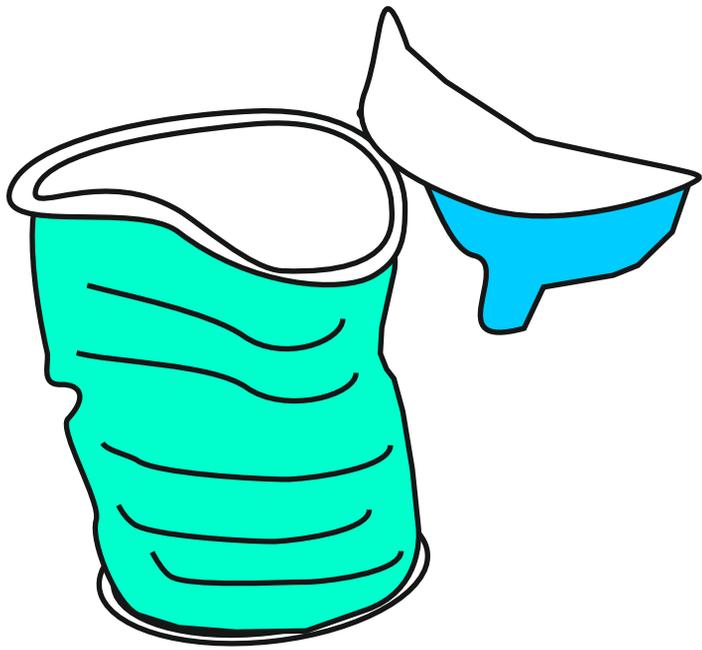

- alle Abfälle aus Plastik

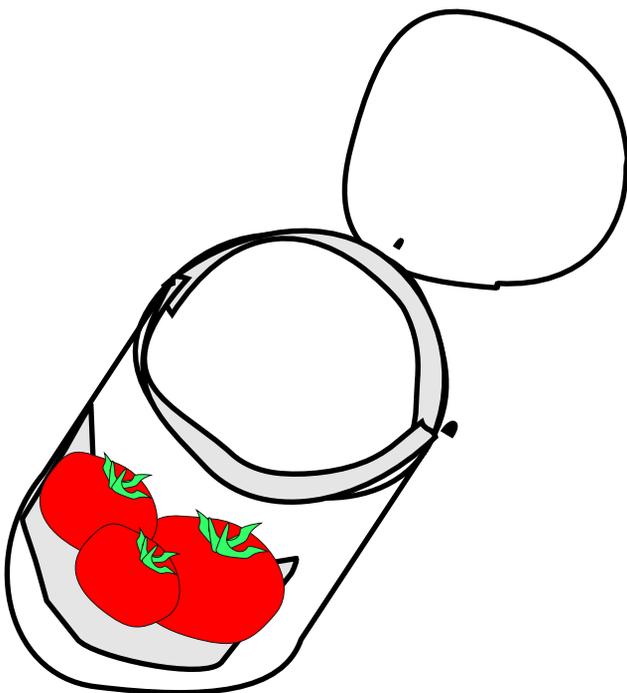

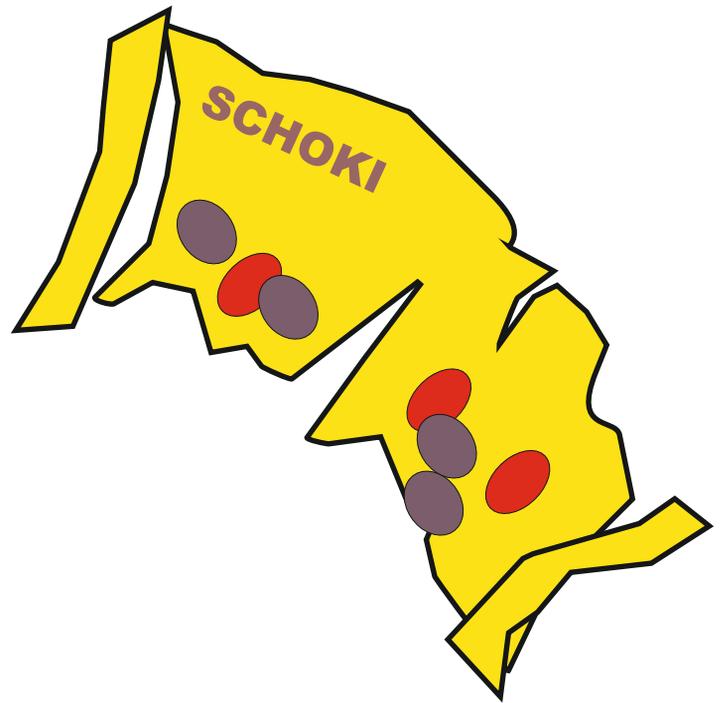

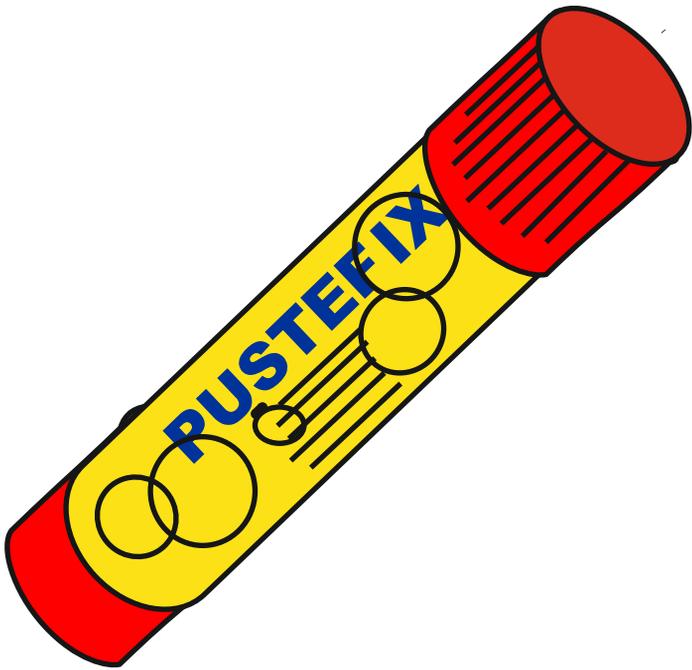

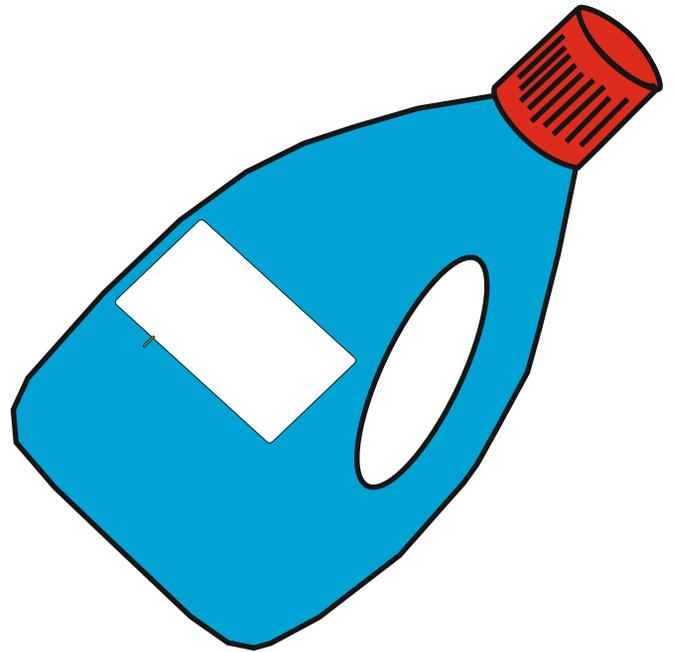

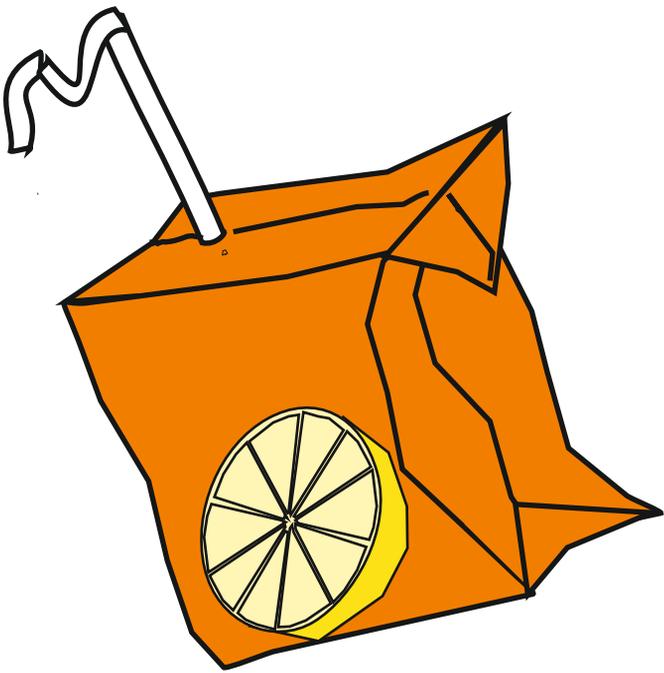

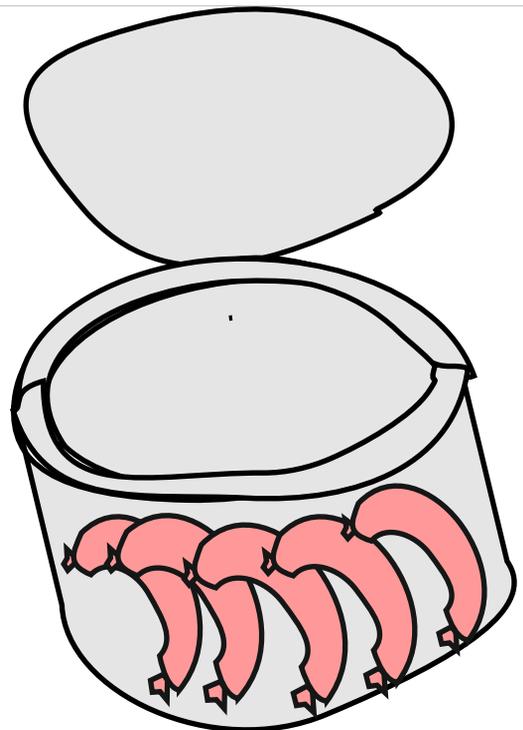

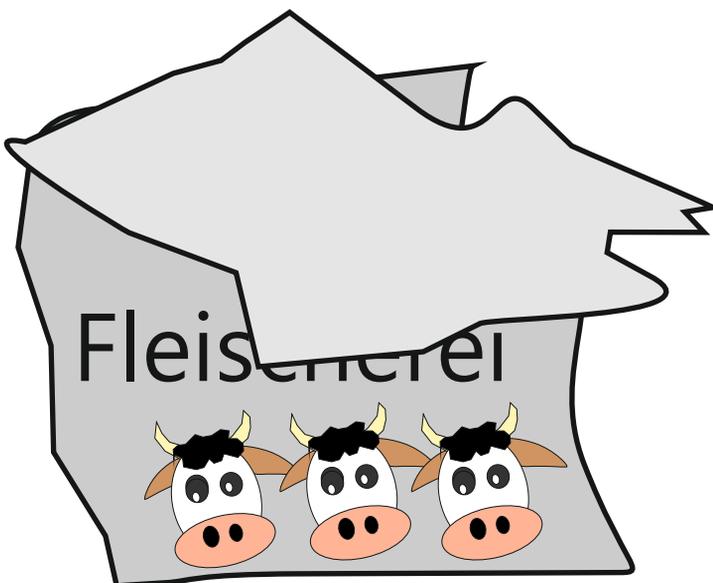

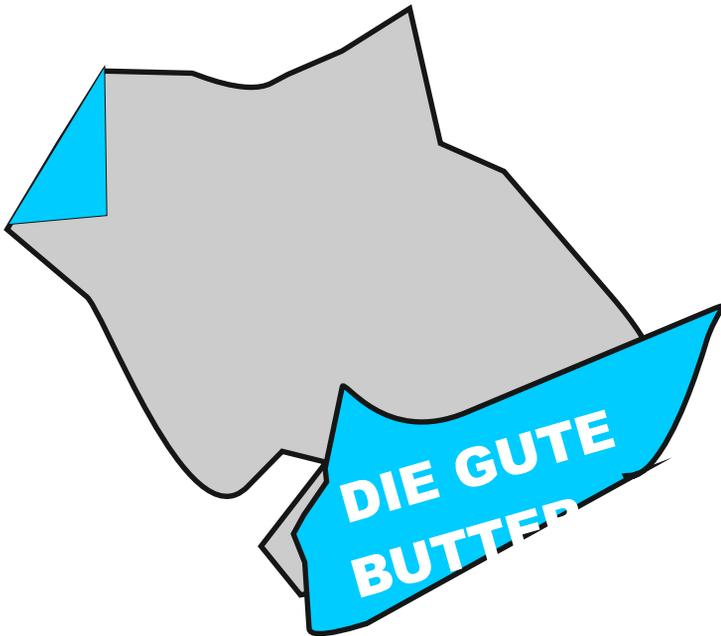

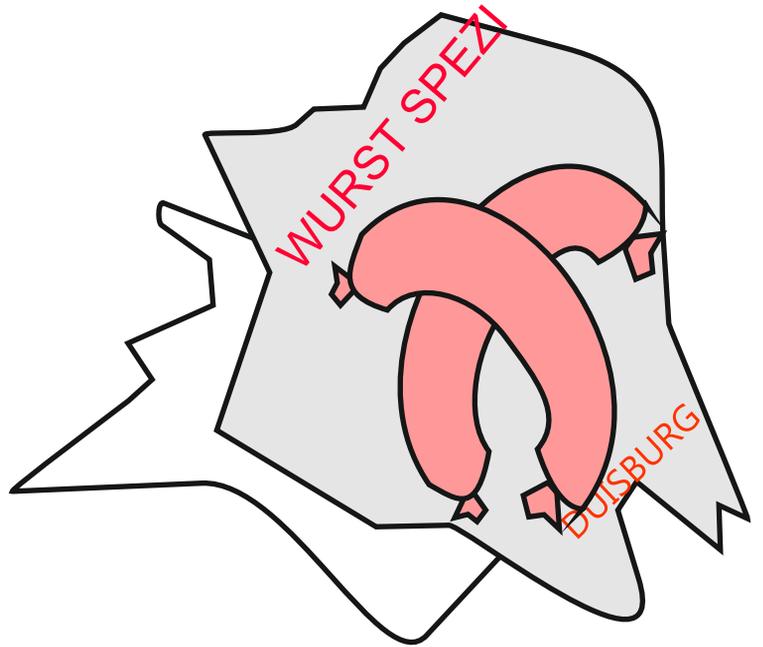

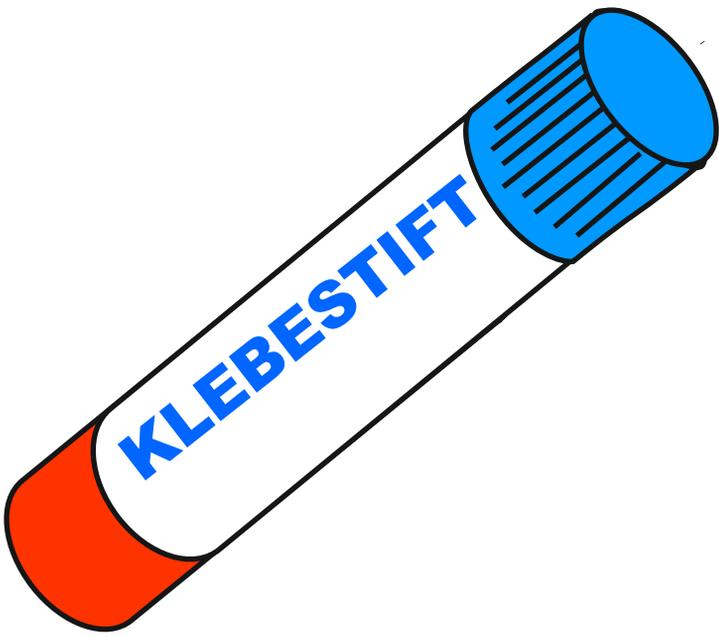

- alle Abfälle aus Verbundstoffe

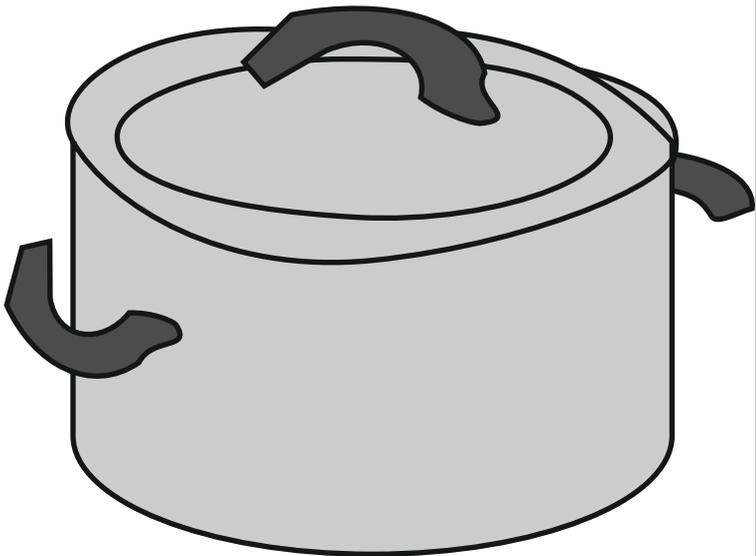

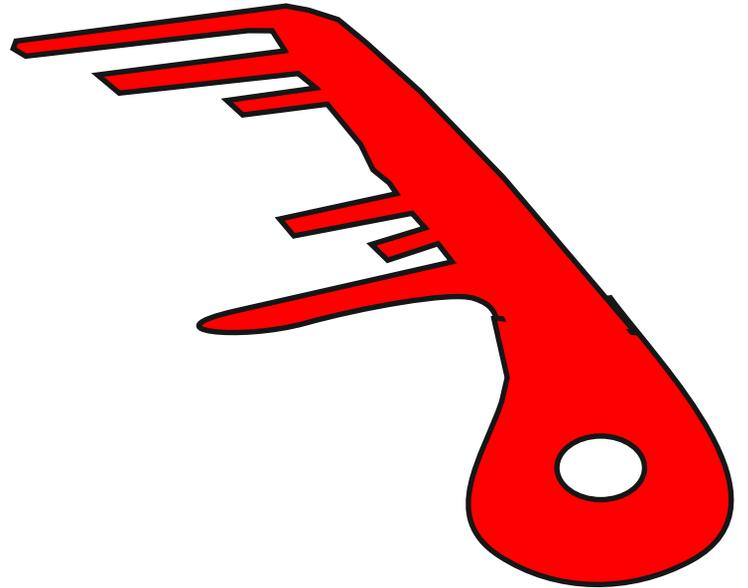

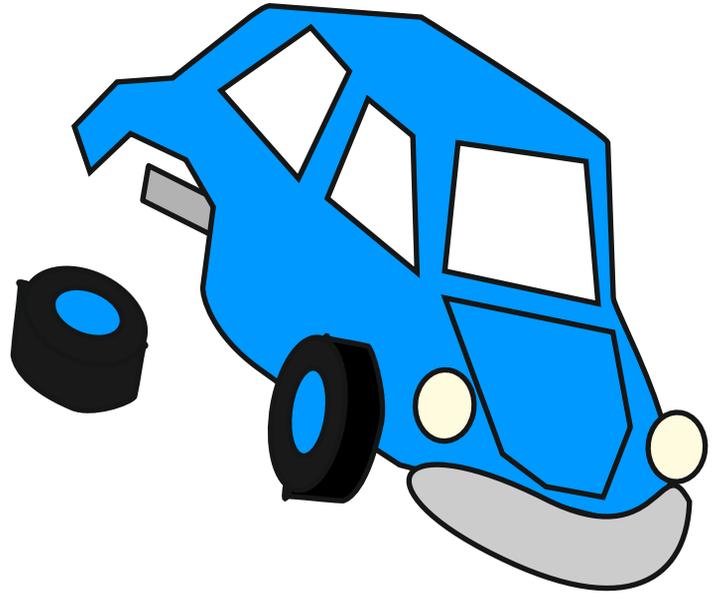

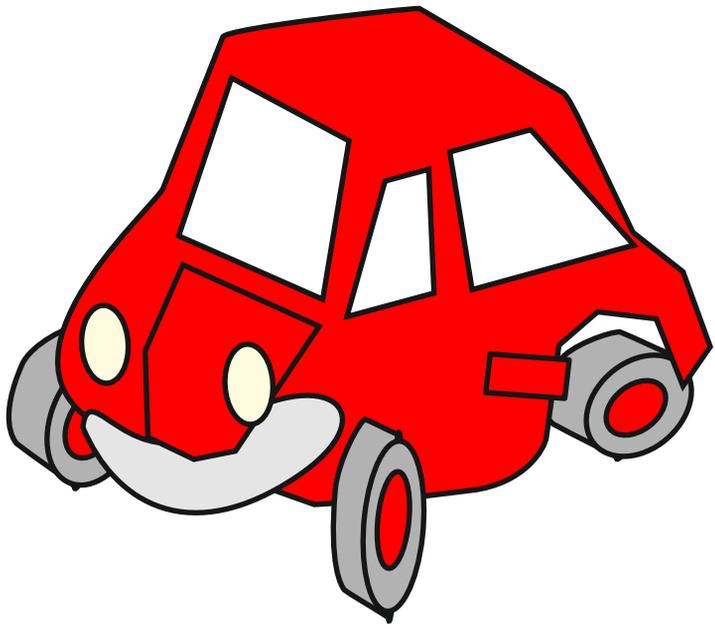

*) früher Gelbe Tonne und nur für Verpackungen

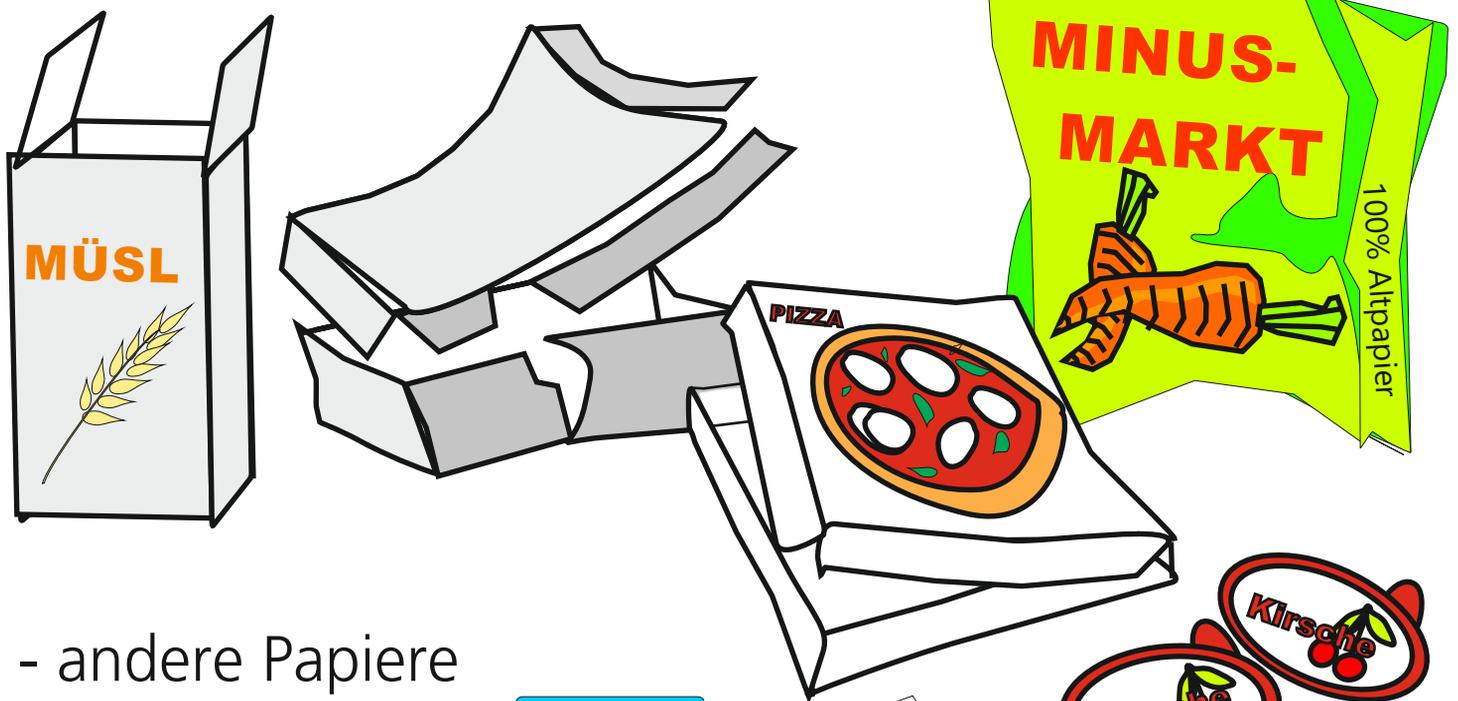

In die Papiertonne gehören:

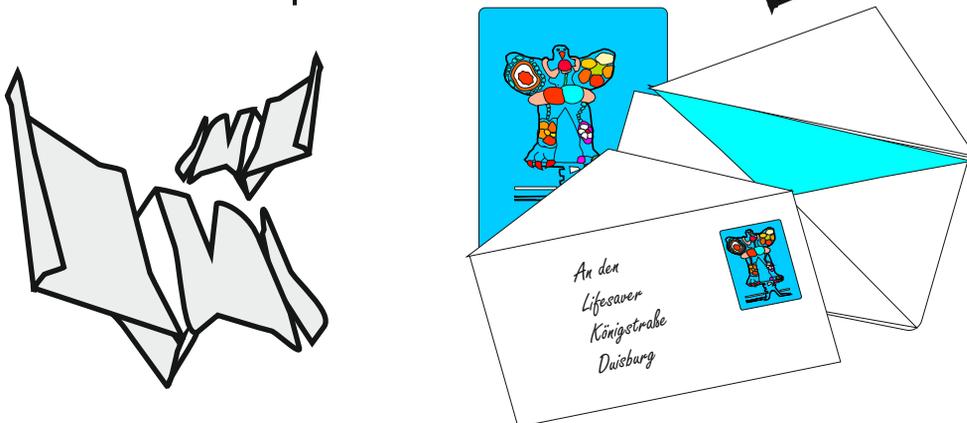

- alte Zeitschriften, Zeitungen, Broschüren etc.

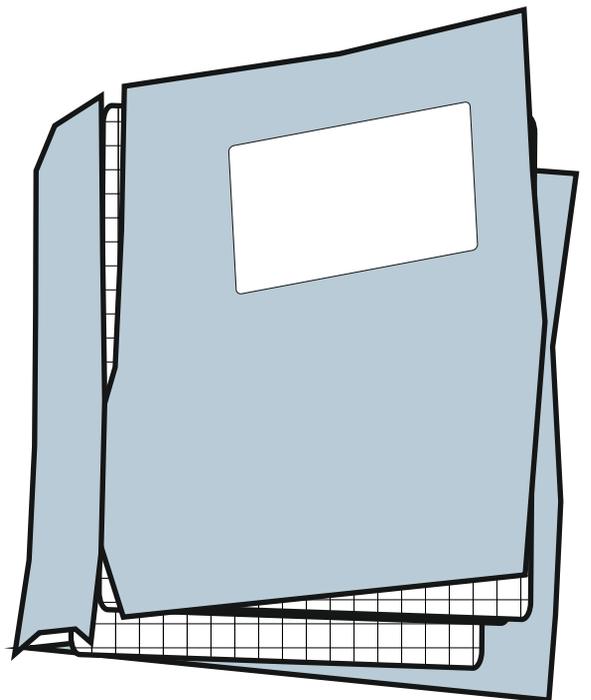

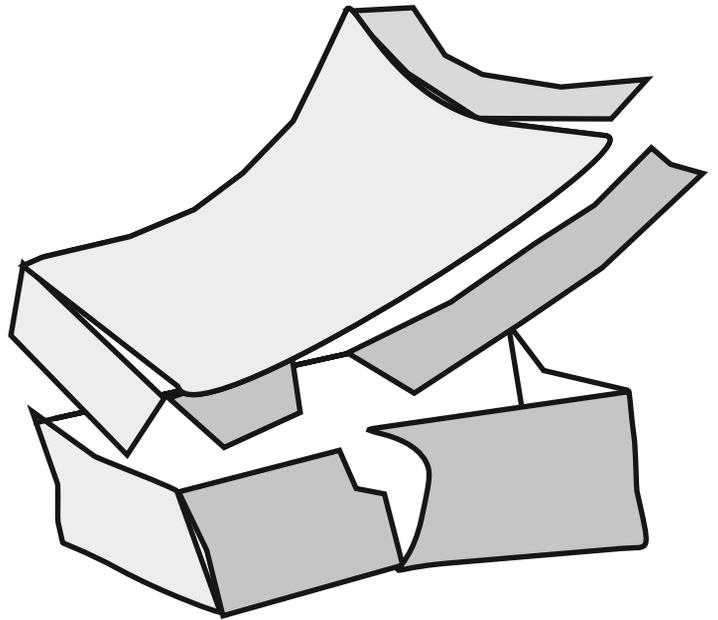

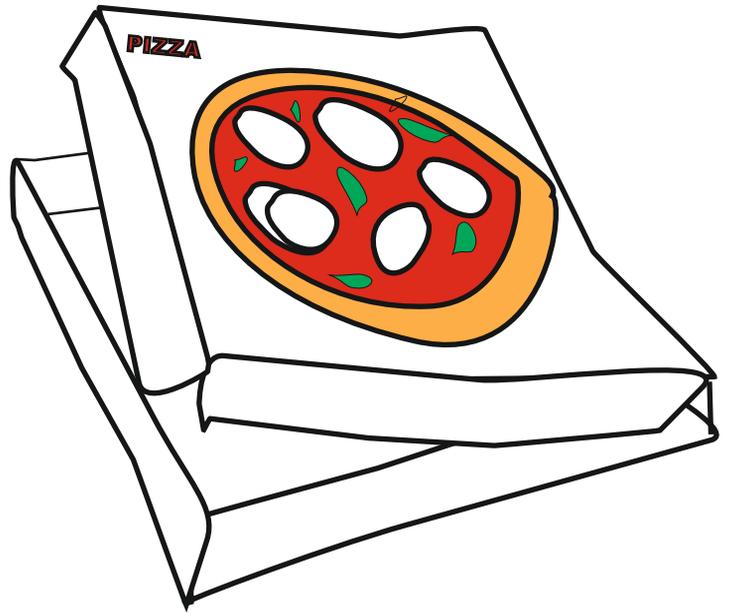

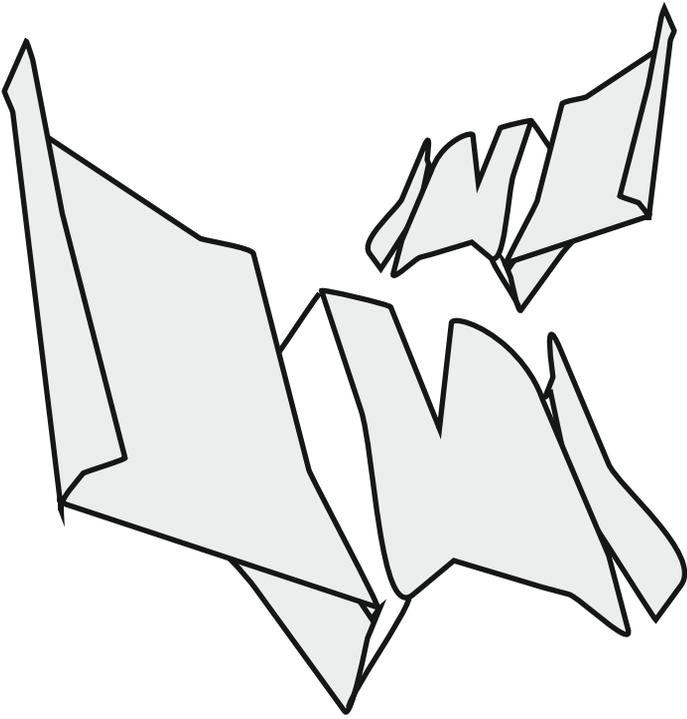

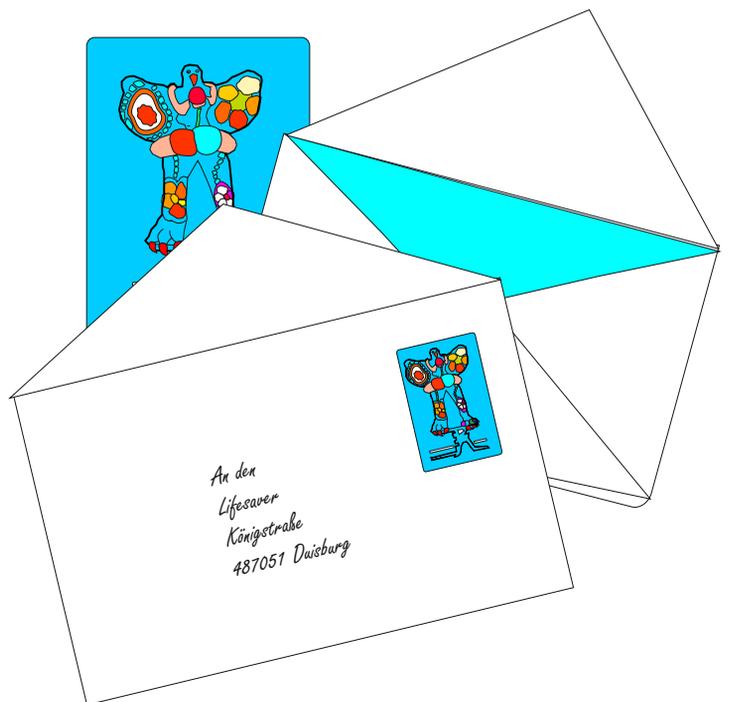

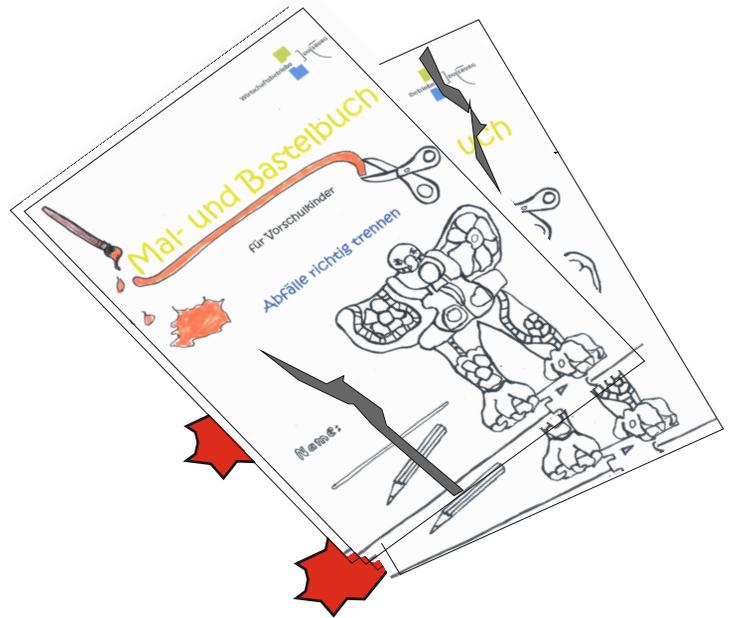

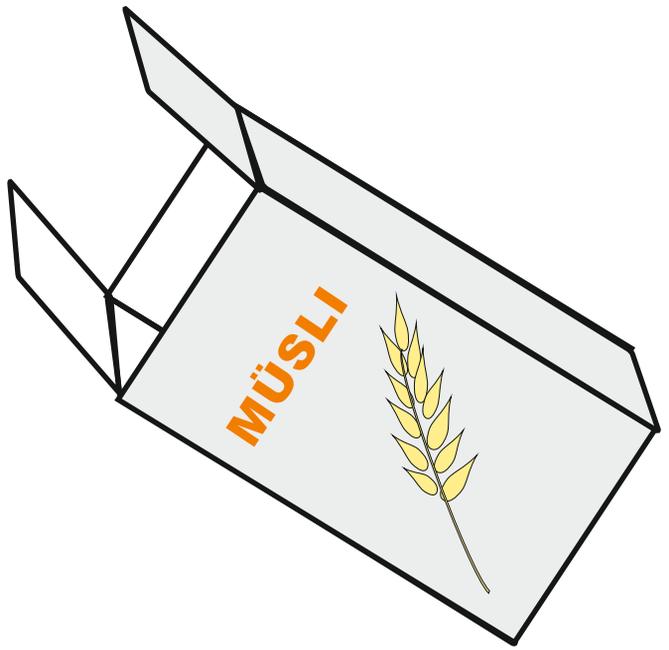

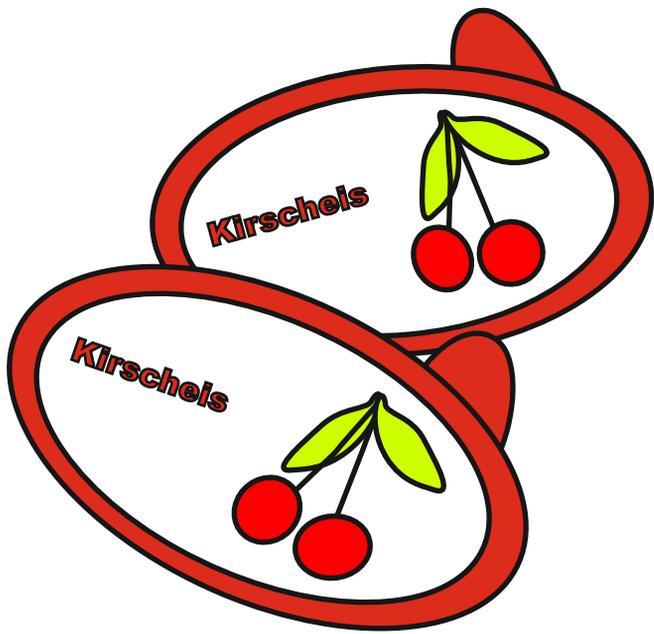

- Tüten und Verpackungen aus Papier

- andere Papiere

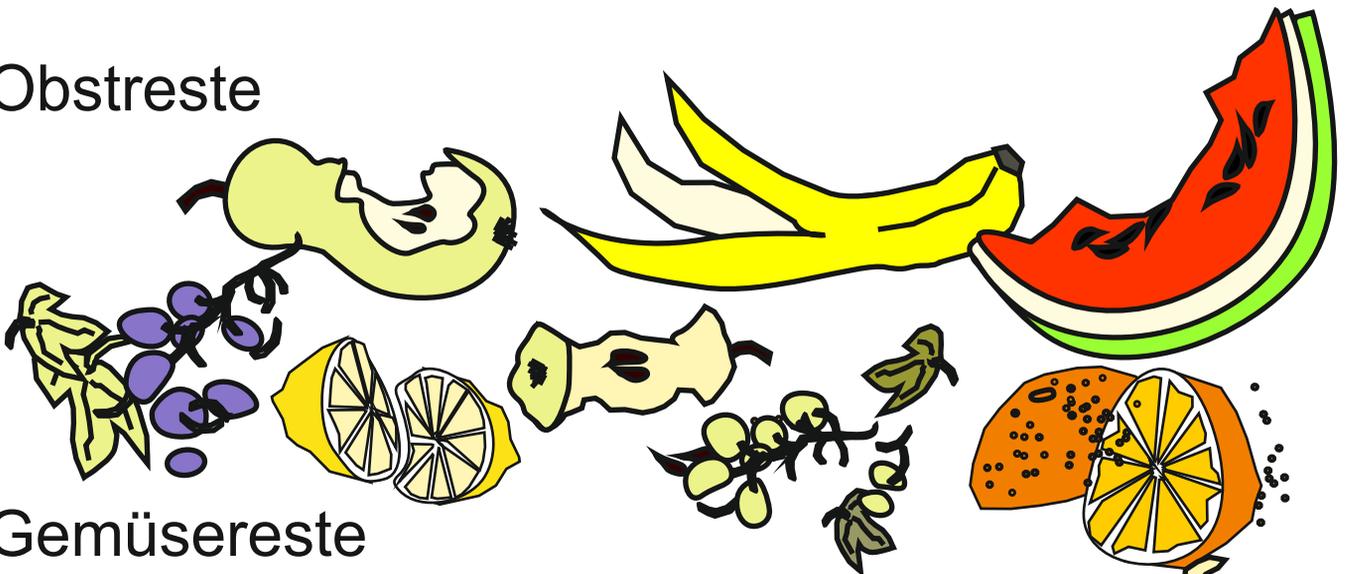

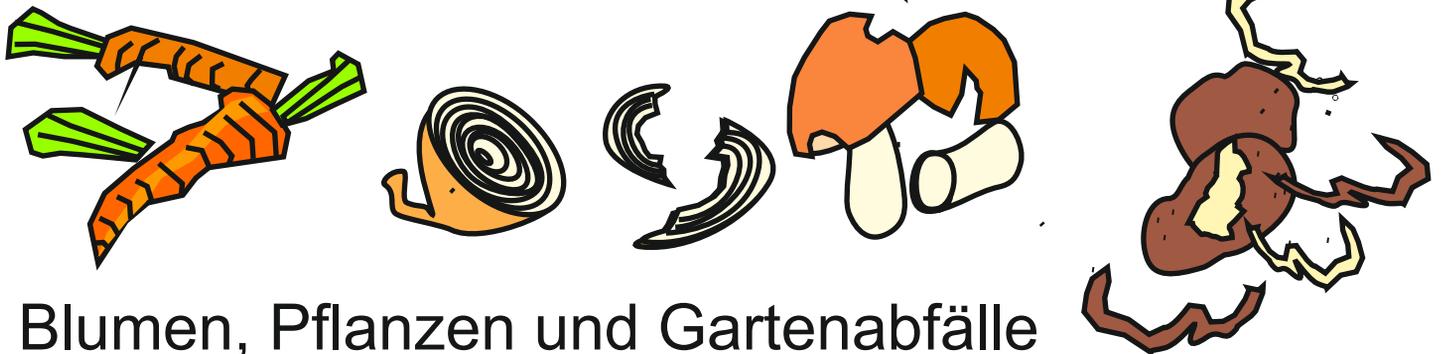

In die Biotonne gehören:

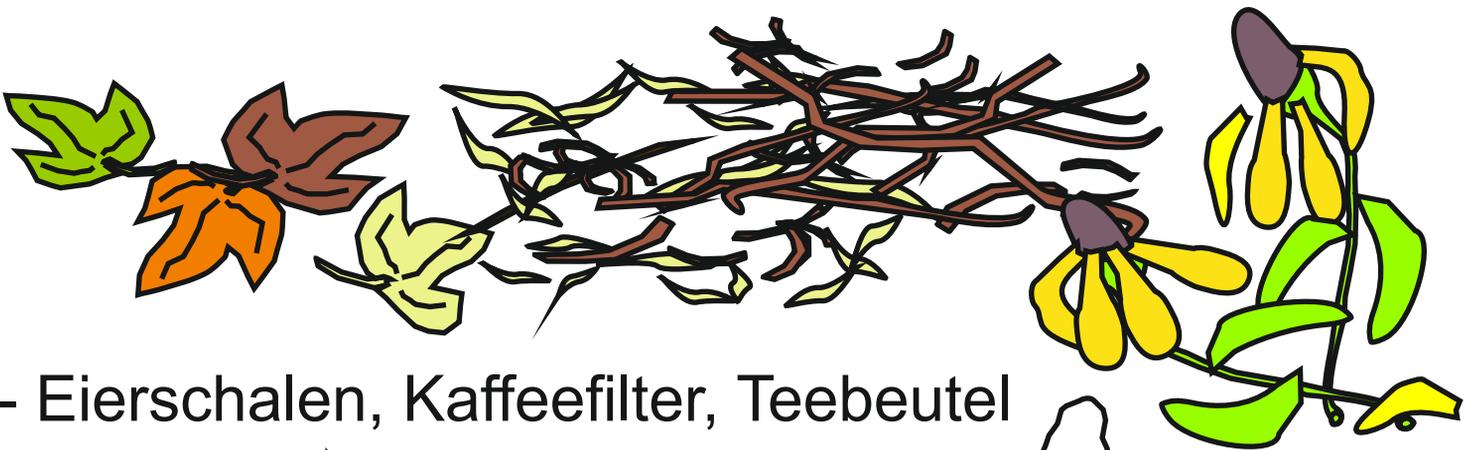

- Obstreste

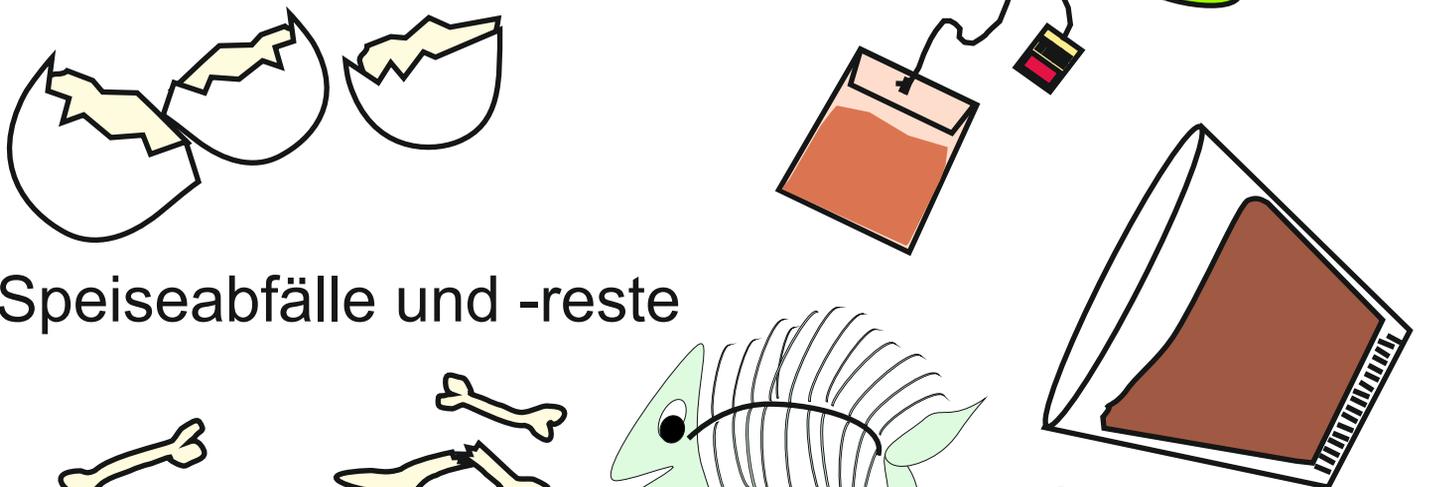

- Gemüsereste

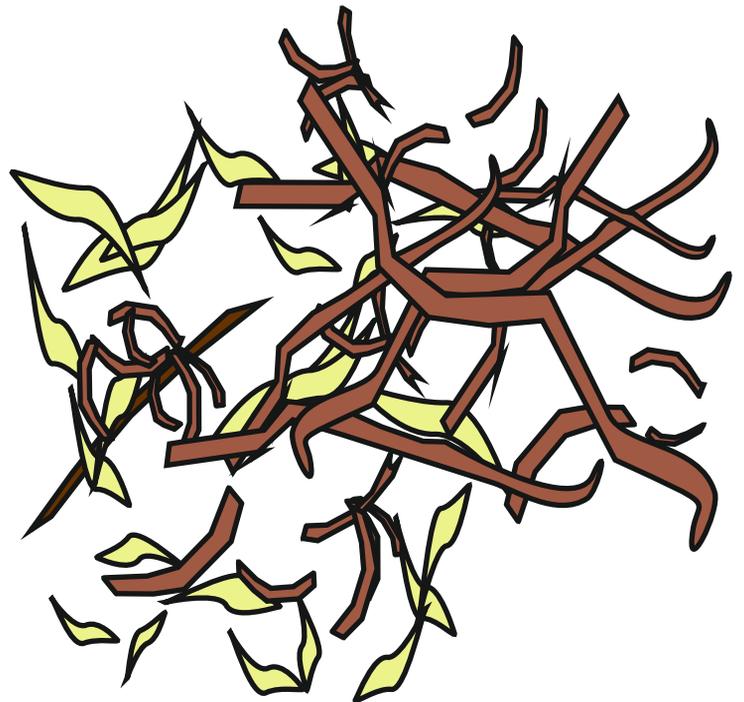

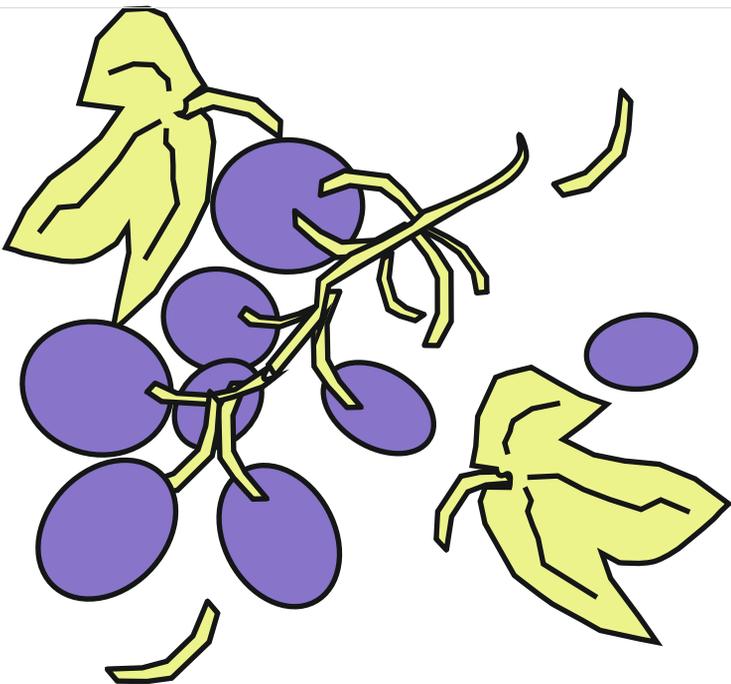

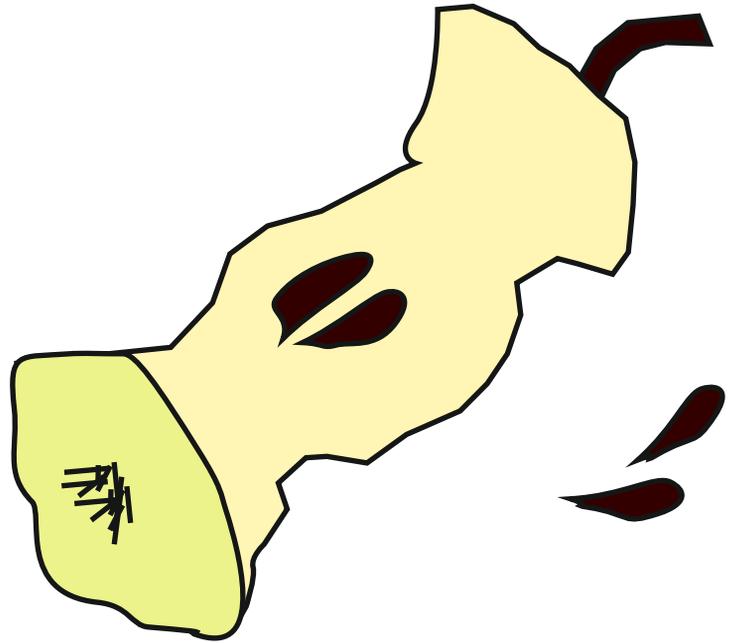

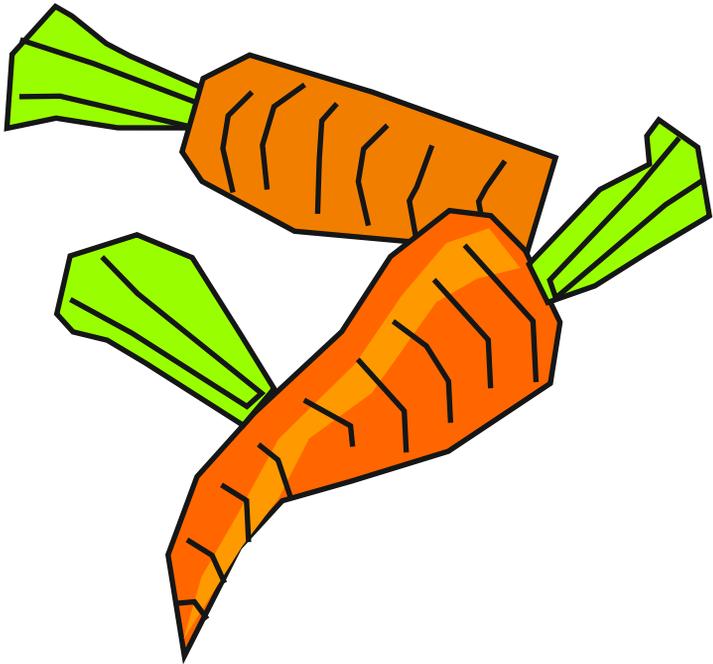

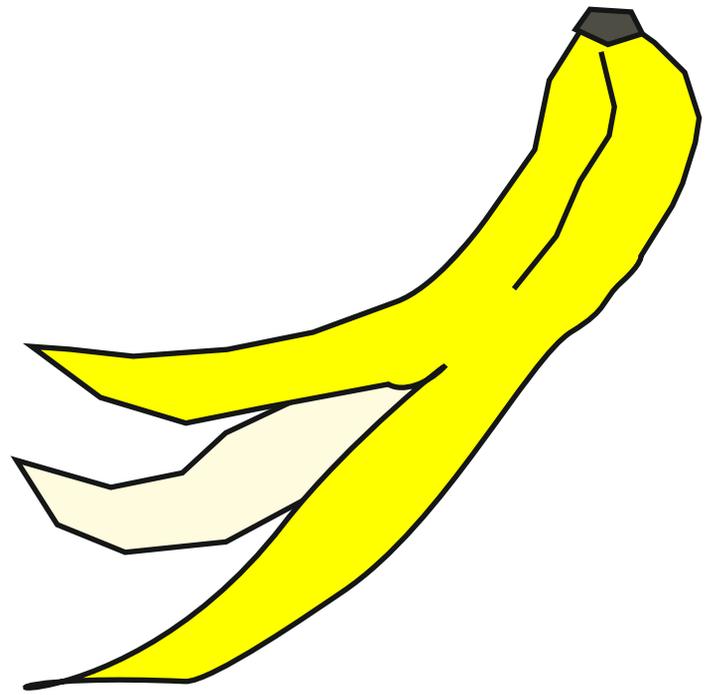

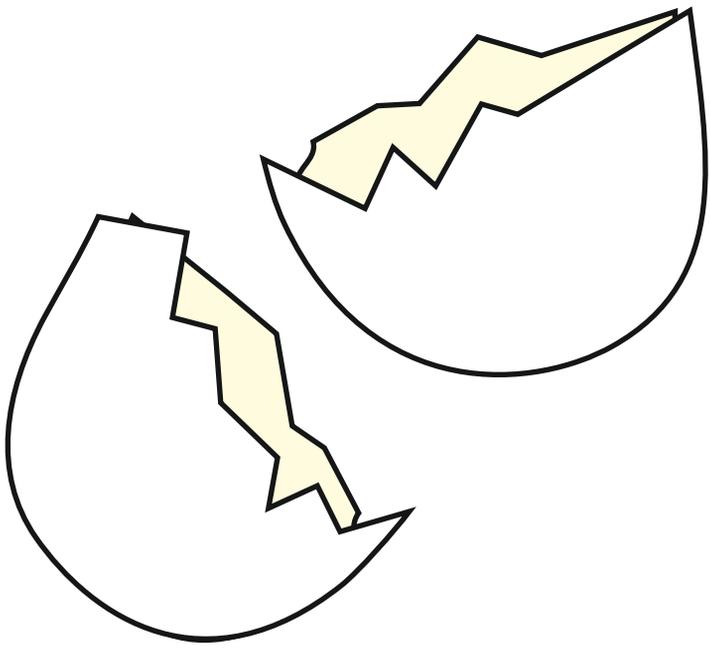

- Blumen, Pflanzen und Gartenabfälle

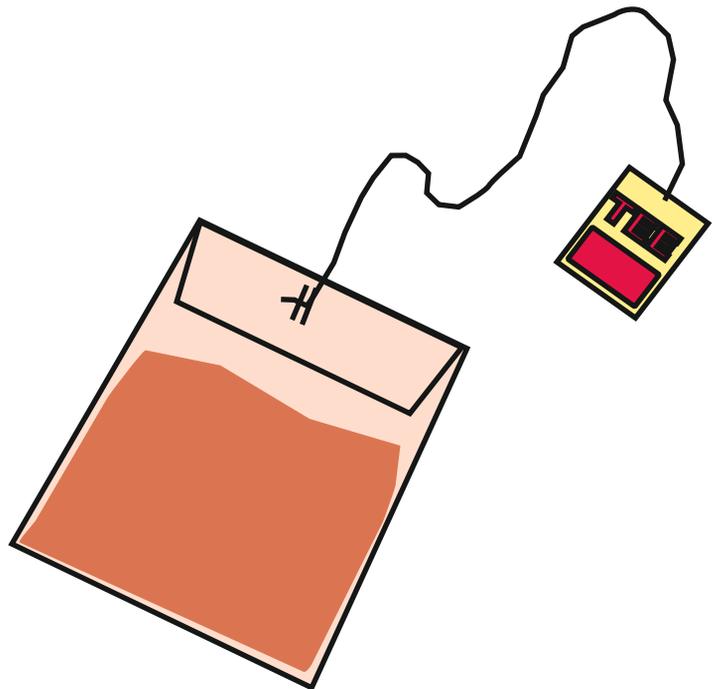

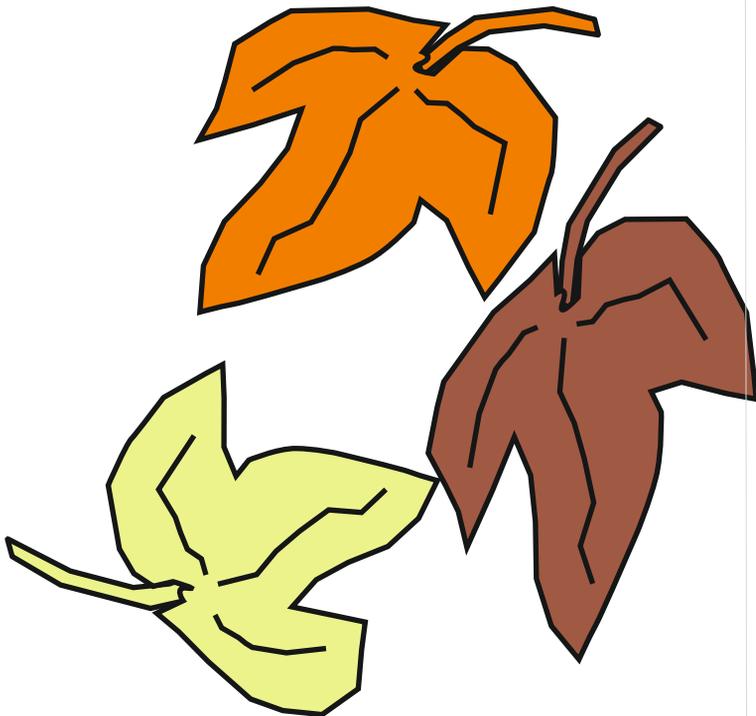

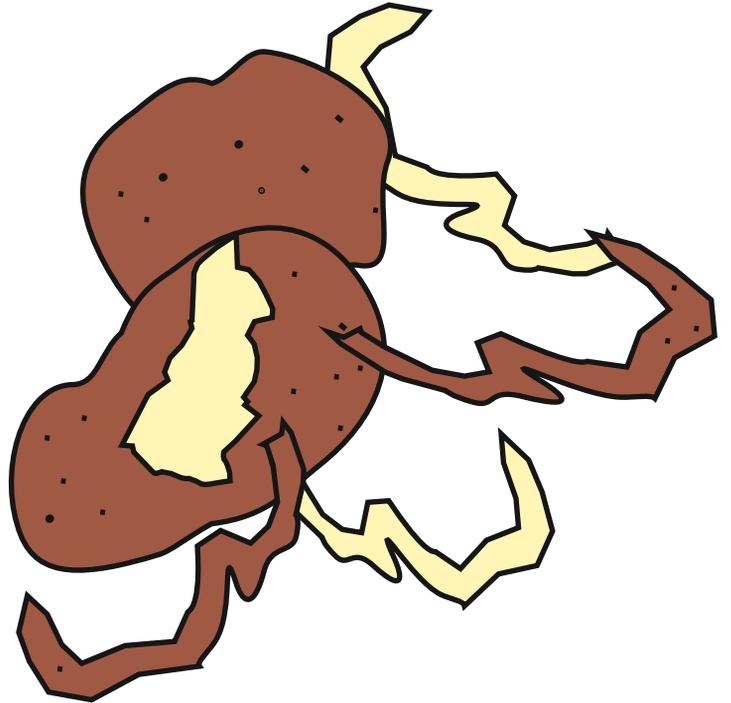

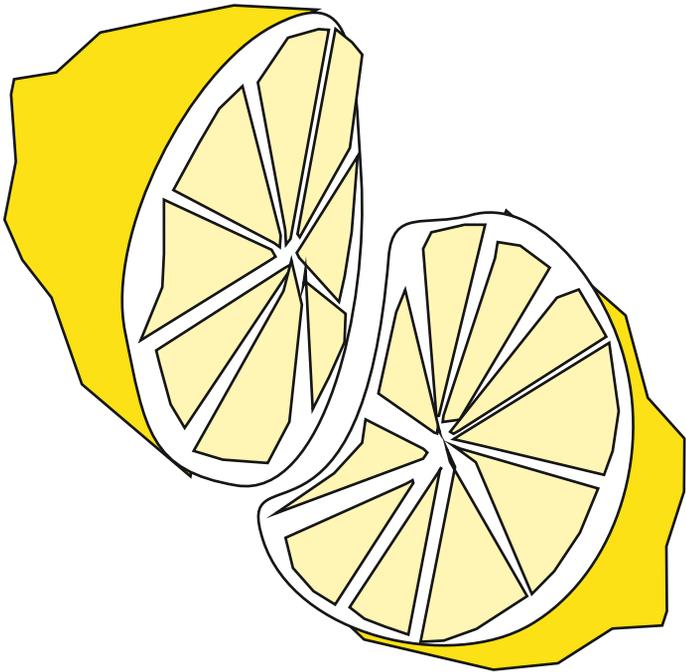

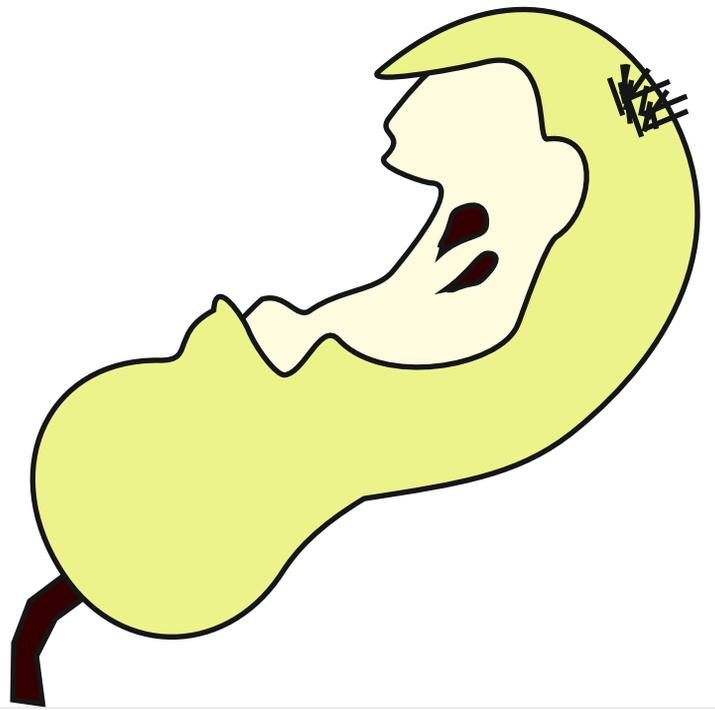

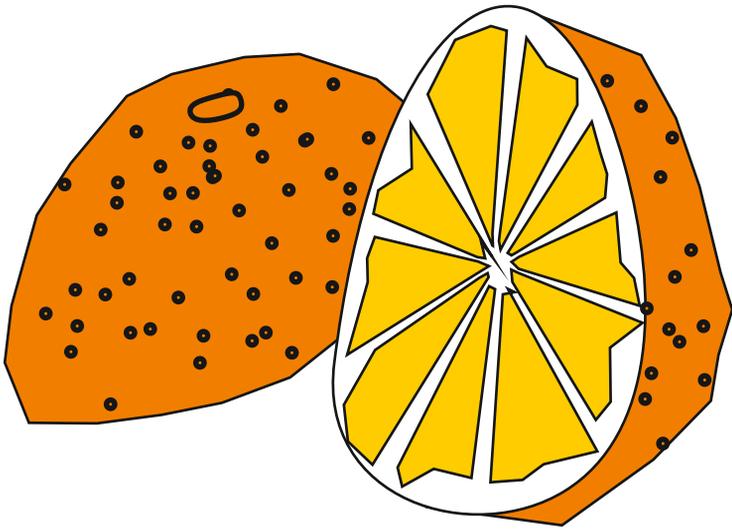

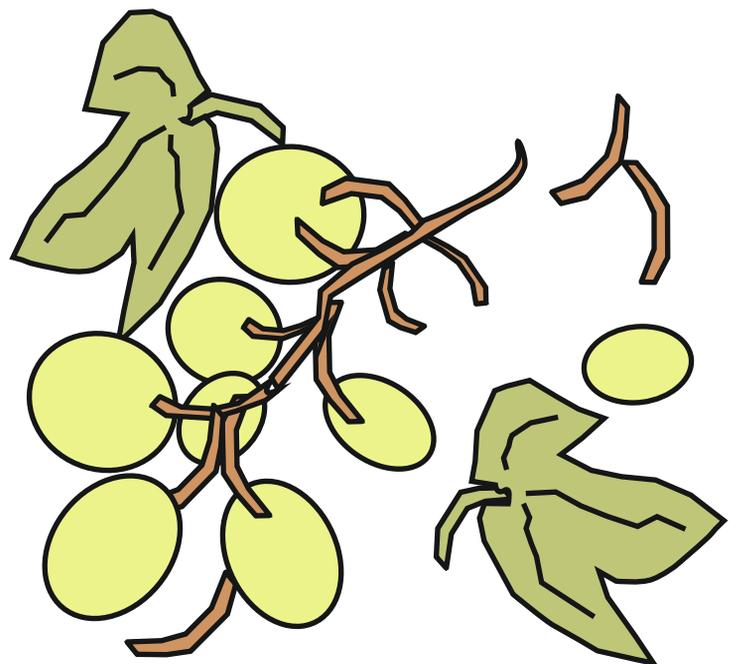

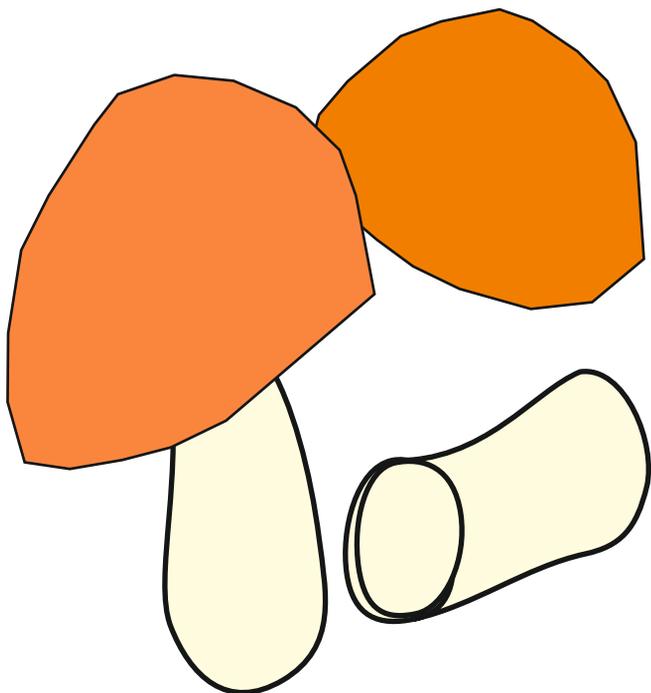

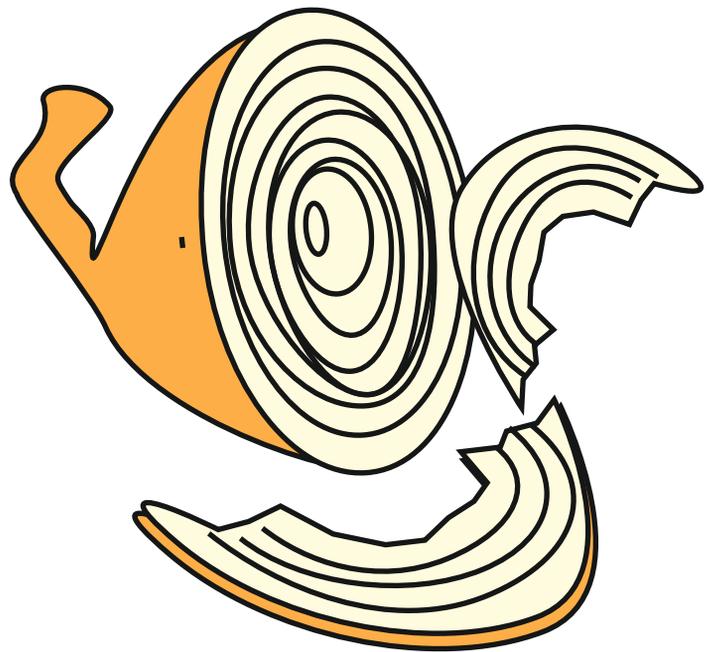

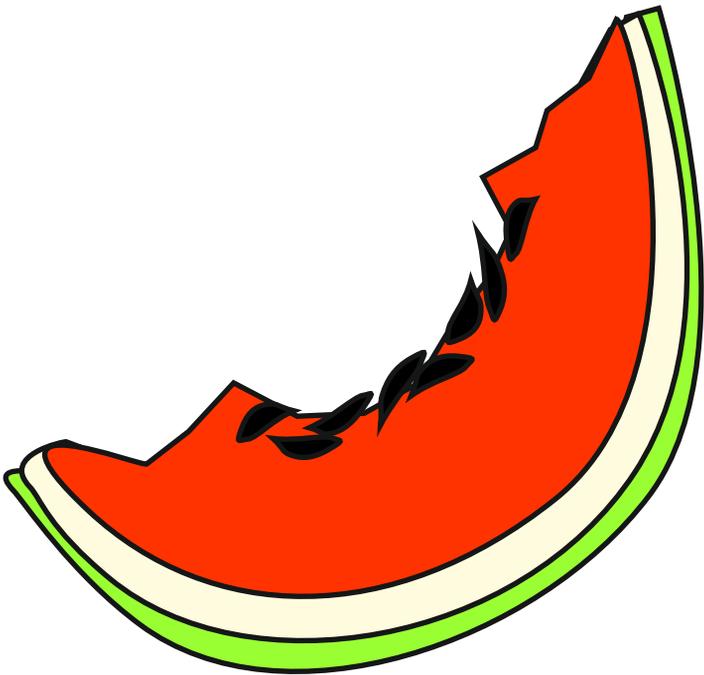

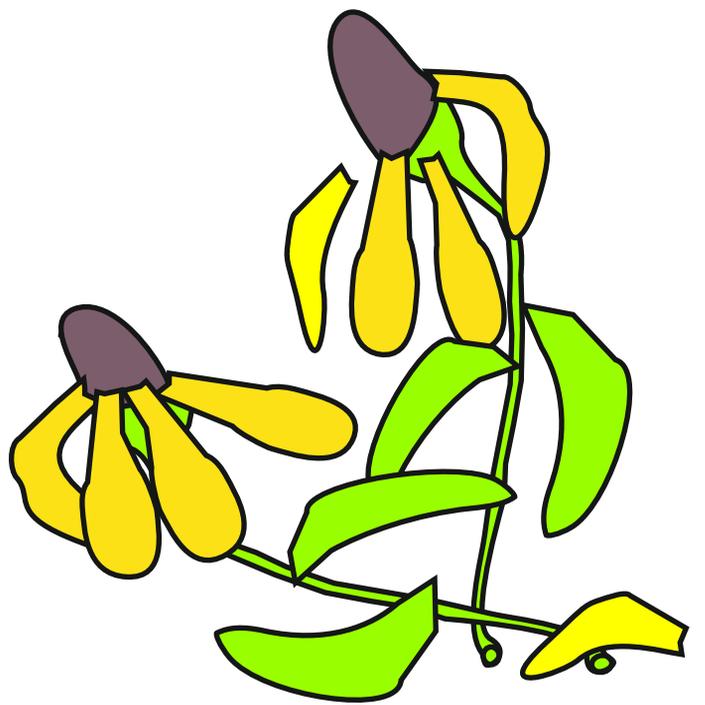

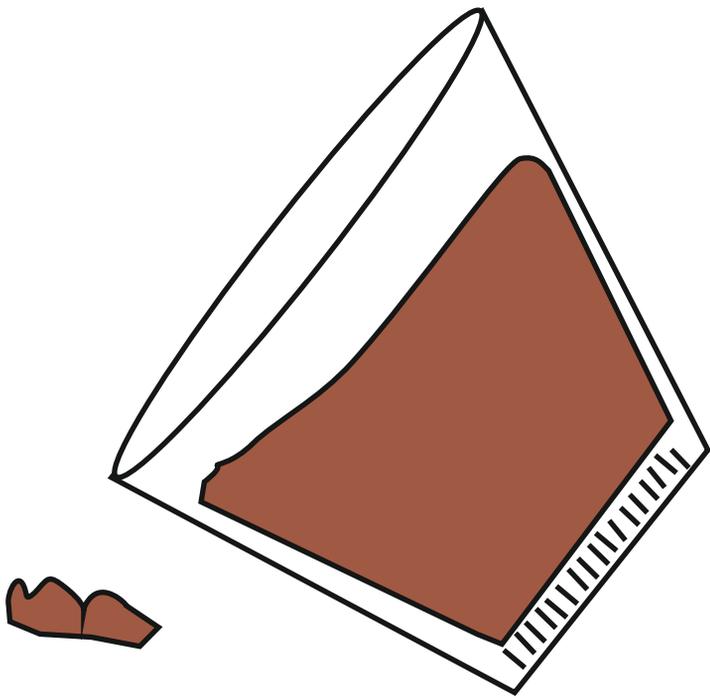

- Eierschalen, Kaffeefilter, Teebeutel

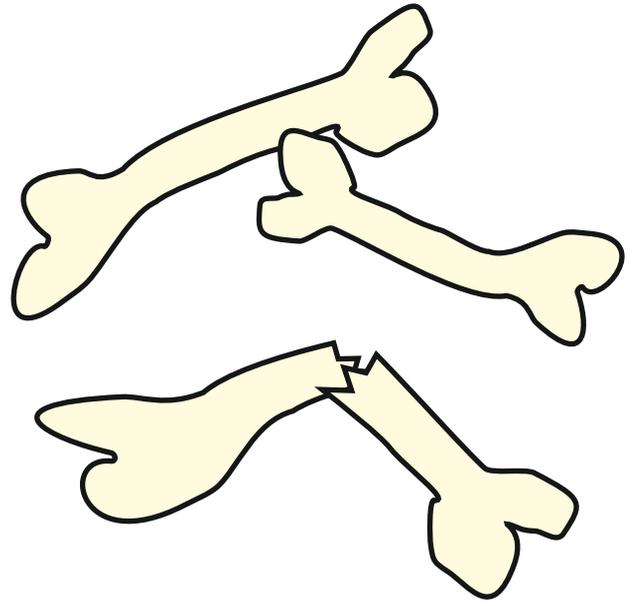

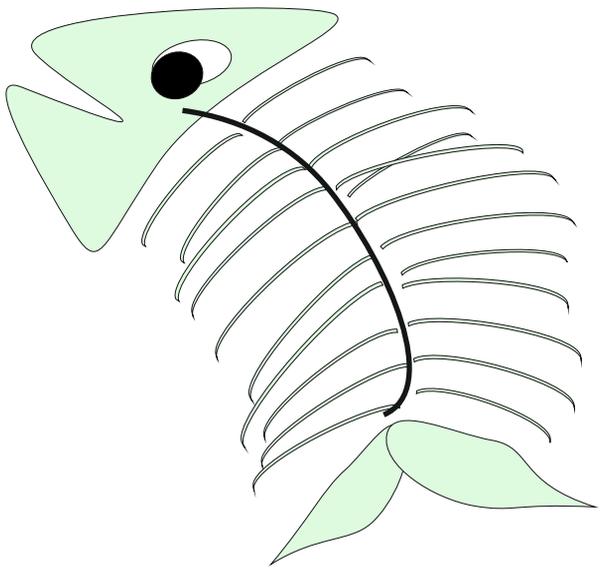

- Speiseabfälle und -reste

In den Glascontainer gehören

Flaschen und Glasbehälter farblich getrennt nach

- Weißglas

- Grünglas

- Braunglas
